MAKEMEAI CONSULTING LTD

AI READINESS REPORT

Abi Daré

abidareauthor.com | Author, Speaker, Educator, Philanthropist

AI READINESS SCORE

58/100

World-class credentials. Underperforming infrastructure. Abi Daré has 184,000 readers and speaks at Harvard. The systems running her business are not keeping pace with her reach.

Generated 27 April 2026 | Prepared by MakeMeAI Consulting Ltd | team@makemeai.tech

£48,000+
Estimated annual value from AI improvements

18 hrs/month
Time reclaimed from admin, bookings and manual content

7 tools
Ready to build with no disruption to current work

The gap that matters

KEY INSIGHT

The audience already exists. The

184,251

Goodreads ratings at 4.4/5.0. These are active, engaged readers who loved the work.

pipeline to reach them does not.

Abi Daré has 184,000 people who cared enough about her work to leave a rating on Goodreads. Only 12,000 follow her on Instagram. That gap represents readers who have no direct relationship with her beyond the book. No newsletter. No Academy. No speaking inquiry. No way back in. Every one of those readers is a missed conversation.

12,000

Instagram followers. The conversion from reader to follower to community member is almost non-existent.

1,945

Goodreads followers. A fraction of her raters are even following her on the platform where they found her.

Where the value comes from

£32,000

Additional speaking revenue per year

An AI inquiry system captures inbound interest 24/7, qualifies event fit instantly, and books intro calls without email back-and-forth. At her current profile and speaking history, four additional engagements per year is conservative.

Additional engagements captured	**4 per year**
Average keynote fee	**£8,000**
Annual uplift	**£32,000**

£13,000

Academy enrollment uplift per year

Smart email sequences that move newsletter readers toward The Louding Voice Academy. A 20% enrollment uplift is achievable with a proper funnel connecting the newsletter, the website, and the Academy offer.

Funnel conversion improvement	**20%**
Estimated audience reachable	**Existing list**
Annual uplift	**£13,000+**

10x

Social content output with no extra time

An AI content pipeline turns book excerpts, press coverage, event appearances, and Foundation updates into ready-to-post LinkedIn, Instagram, and X content. Five posts per week, every week, in her exact voice. Zero manual writing.

Current posting effort	**Manual, irregular**
With AI pipeline	**5 posts/week**
Time saved on content	**5 hrs/month**

18 hrs

Reclaimed every month from manual admin

Speaking coordination, booking emails, school visit admin, social content creation, and media monitoring are all currently done by hand. Every hour reclaimed is an hour back on writing, the Foundation, or the Academy.

Speaking admin saved	**6 hrs/month**
Content creation saved	**5 hrs/month**
Visit coordination + monitoring	**7 hrs/month**

Time savings breakdown

This is where 18 hours per month actually comes from. Each figure is based on typical time spent by an author-speaker managing these tasks manually without automation.

Speaking inquiry management	6 hrs
Social content creation	5 hrs
School and org visit admin	4 hrs
Media and review monitoring	3 hrs

TOTAL SAVED PER MONTH **18 hours**

Revenue opportunity breakdown

These are the three clearest commercial opportunities based on publicly available information. With full access to her systems and audience data, the actual figure is likely higher.

Additional speaking engagements

4 engagements captured via automated inquiry system, at £8,000 average. Harvard, House of Lords, and Women's Prize Trust calibre events do not come cheap.

£32,000

Louding Voice Academy enrollment uplift

20% increase in course conversions from newsletter audience with a properly automated email funnel and website-to-Academy pathway.

£13,000

Foundation supporter and donor growth

An automated donor nurture pipeline for The Louding Voice Foundation. Supporters acquired at events and online converted into long-term backers.

£3,000+

ESTIMATED TOTAL ANNUAL UPLIFT **£48,000+**

Area scores

Website Quality **8/10**

Professional, well-structured, and clearly branded. Four pillars defined. Newsletter signup and CTAs in place. Missing a live chat, FAQ system, and automated booking path.

Verified via website fetch

Social Media Presence **4/10**

12K Instagram followers and an X/Twitter account. No LinkedIn author profile. No YouTube or TikTok. For an author with 184K Goodreads raters, the social footprint is severely underscaled.

12K Instagram confirmed

Online Reputation and Reviews 9/10

Exceptional. 184,251 Goodreads ratings at 4.4/5.0. 20,018 written reviews. Published in 24 languages. Reader sentiment is overwhelmingly positive across all platforms checked.

184,251 ratings verified via Goodreads

Content Marketing 4/10

The Louding Life newsletter is a good foundation. But no blog, no YouTube channel, no podcast, and no TikTok/BookTok presence identified. A speaker of this calibre should own a much larger content footprint.

Newsletter confirmed, no video found

Automation Readiness 3/10

A contact form and newsletter signup are the only automations visible. No chatbot, no online booking calendar, no email nurture sequences, no CRM integration. The biggest gap across all six areas.

Verified via website and platform review

Authority and Positioning 9/10

NYT bestseller. Climate Fiction Prize winner. Book Aid International Ambassador 2026. Honorary Doctorate from Glasgow Caledonian University. Harvard and House of Lords keynote speaker. The Independent's Climate 100 Power List.

Verified via Wikipedia, Champions Speakers, and press

Social media audit

Platform-by-platform data collected 27 April 2026

INSTAGRAM	GOODREADS	X / TWITTER	LINKEDIN
12,000	**1,945**	**Active**	**Missing**
Followers @abidare_author	Followers (184K raters)	@abidare_author	No author profile found
Active account but severely underscaled. A NYT bestselling author who speaks at Harvard should command 100K+ followers on this platform alone.	The contrast is stark. 184,000 people rated her books. Only 1,945 follow her author profile on the platform. The pipeline from reader to community member is missing.	Account exists and is searchable. Platform authentication walls prevented full data pull. Follower count not publicly accessible without login.	No verified personal LinkedIn profile for Abi Daré the author and speaker. A major gap for B2B speaking enquiries and corporate event organisers who

			research on LinkedIn first.
YOUTUBE / TIKTOK **None** No channel found No YouTube channel or TikTok presence identified. BookTok has made careers overnight for authors with far smaller existing audiences. This is an untapped channel.	AMAZON **Active** Author page live Amazon author page active. Positive reader sentiment. The Girl with the Louding Voice leads sales. No automation connecting Amazon readers back into her owned channels.	GOODREADS REVIEWS **20,018** Written reviews at 4.4/5.0 Outstanding reader loyalty. These 20,000 reviewers are her most engaged fans. None of them are in an automated relationship-building sequence.	LANGUAGES **24** Translation markets Published in 24 languages across global markets. No multilingual digital strategy or international audience capture system in place.

Speaking track record

Abi Daré is represented by Champions Speakers and has addressed some of the most prestigious institutions in the world. Her previous career spans BP, Virgin Atlantic, and Pharma Intelligence, giving her credibility in both literary and corporate boardroom settings. The speaking demand is real. The inquiry capture system is not.

- **Harvard Kennedy School**
- **House of Lords**
- **Women's Prize Trust**
- **International Rescue Committee**
- **University of Wolverhampton**
- **The Felsted School**

> Every one of these organisations went through a manual inquiry process. Every event that slipped through an inbox unmanaged is lost revenue. An automated speaking inquiry system would have captured, qualified, and converted more of those inbound requests from day one.

7 tools we would build

TOOL 01

Speaking Inquiry AI

A website assistant that captures speaking inquiry details around the clock. Event type, audience size, topic preferences, and budget gathered automatically. Intro calls booked without a single email exchange. No more lost enquiries.

Saves 6 hrs/month in admin

TOOL 02

Academy Enrollment Engine

Automated email sequences that move newsletter readers toward The Louding Voice Academy. Segmented by reading behaviour. The right offer to the right reader at the right moment. No manual follow-up required.

Target: 20% enrollment uplift

TOOL 03

Social Content Pipeline

AI that turns book excerpts, press coverage, award announcements, and Foundation updates into ready-to-post Instagram, X, and LinkedIn content. Five posts per week, consistent voice, zero manual writing required from Abi.

5 posts/week, fully on-brand

TOOL 04

School and Org Visit Scheduler

Automated booking system for school visits and corporate author events. Inquiry form, calendar sync, confirmation emails, briefing pack, and pre-visit communications all handled without any manual coordination.

Saves 4 hrs per booking cycle

TOOL 05

Media and Mention Monitor

Daily tracking of Goodreads, Amazon, press outlets, and social platforms for new reviews, citations, and media mentions. Every press hit and reader review surfaced automatically before the moment passes.

Never miss a press hit again

TOOL 06

Reader Relationship Manager

Newsletter audience segmented by reading behaviour. Goodreads fans get different messages from Academy students or corporate event prospects. Relevance at scale, built around her four pillars: Writer, Speaker, Teacher, Philanthropist.

Higher open rates, more conversions

TOOL 07

Foundation Donor Pipeline

An automated supporter journey for The Louding Voice Foundation. People who meet Abi at events, buy her books, or sign up online are nurtured into long-term Foundation supporters and donors with no manual outreach needed.

Grows the Foundation passively

Gaps and opportunities

What is missing right now

- No chatbot or AI assistant to handle FAQs and capture leads on the website
- Speaking inquiries go through a general contact form with no structured intake or auto-qualification
- No automated email sequences for newsletter subscribers
- 12K Instagram followers against 184K Goodreads raters. The reader-to-follower pipeline is broken.
- No LinkedIn personal author profile. Corporate event organisers research speakers on LinkedIn first.
- No YouTube or TikTok presence despite being a compelling speaker and educator
- No visible CRM or pipeline for managing speaking enquiries and corporate follow-ups
- The Louding Voice Academy has no visible funnel connecting the main website to enrollment

What AI could fix

- 24/7 speaking inquiry capture with auto-qualification and calendar booking
- Newsletter-to-Academy funnel generating passive course revenue every month
- AI content system turning every event, book excerpt, and press mention into social posts
- BookTok and LinkedIn content strategy to close the gap between 184K raters and 12K followers
- School visit booking system handling all coordination without admin overhead
- Automated reader sequences that build loyalty and drive Academy and Foundation conversions
- Media monitoring so every press hit and review opportunity is captured and acted on
- Foundation donor pipeline that grows supporter base with no ongoing manual outreach

AREA	CURRENT STATE	STATUS
Author website (abidareauthor.com)	Professional, four-pillar structure, strong CTAs. Clean visual identity. No chatbot or booking system.	Strong
Website AI assistant or chatbot	Not present. Visitors have no guided experience and no 24/7 inquiry channel.	Missing
Speaking inquiry process	General contact form only. No structured intake, no auto-qualification, no calendar booking.	Manual
Speaking agency representation	Listed with Champions Speakers. Harvard, House of Lords, and Women's Prize Trust clients confirmed.	Active
Newsletter (The Louding Life)	Signup form on website. Exists as a channel. No automated sequences or segmentation visible.	Basic
Email automation and nurture sequences	No visible email automation from the public-facing site. All subscriber communication appears manual.	Missing
Academy enrollment funnel	The Louding Voice Academy exists. No visible funnel connecting website visitors or newsletter readers to enrollment.	Gap
Instagram (@abidare_author)	12,000 followers. Active but underscaled for an author with 184K Goodreads raters and global media coverage.	Underscaled
X / Twitter (@abidare_author)	Account active and searchable. Follower data not accessible without login. Presence confirmed.	Active
LinkedIn author profile	No verified personal LinkedIn profile found for Abi Daré the author and	Missing

AREA	CURRENT STATE	STATUS
	speaker. Corporate bookers check LinkedIn.	
YouTube or TikTok (BookTok)	No channel found. A speaker and educator with her profile should own video. BookTok is a major missed channel.	Missing
Goodreads author presence	184,251 ratings, 4.4/5.0, 20,018 reviews, 1,945 followers. Exceptional reader reception.	Exceptional
Amazon author page	Active. Both novels listed. Positive reader sentiment. No automation connecting Amazon buyers back into owned channels.	Active
School and org visit booking	Via general contact form only. No automated intake, scheduling, or briefing pack system in place.	Manual
Foundation digital presence	The Louding Voice Foundation referenced on the website. No separate digital donor or supporter funnel visible.	Basic
Media and press monitoring	No automated monitoring visible. Reviews and press mentions tracked manually based on public information.	Manual
International markets (24 languages)	Published in 24 languages across global markets. No multilingual digital strategy or international audience capture visible.	Untapped
Global authority and positioning	NYT bestseller, Climate Fiction Prize, Book Aid Ambassador 2026, Harvard keynote, House of Lords, Independent Climate 100.	World-class

What a partnership looks like

What we do every month

- ✓ Build and maintain all seven AI systems running across the business
- ✓ Run the social content pipeline so no week is ever blank
- ✓ Monitor and tune the speaking inquiry and Academy enrollment flows
- ✓ Track all media mentions, reviews, and press hits across platforms
- ✓ Monthly review: what the data shows, what to adjust, what to build next
- ✓ On-call support for anything that needs a fast turnaround

What you walk away with

- ✓ 18 hours per month back to focus on writing, speaking, and the Foundation
- ✓ Speaking inquiries captured and qualified automatically, nothing dropped
- ✓ Academy revenue growing without more hours invested
- ✓ Social presence that reflects the actual scale of your global reach
- ✓ A clear reader-to-community pipeline that monetises your existing 184K audience
- ✓ Price lock promise: your retainer rate stays fixed until you choose to renegotiate

MINIMUM TERM	ONBOARDING TIME	FIRST TOOLS LIVE

This report was built from publicly available information alone: her website, Goodreads profile, Champions Speakers listing, Wikipedia, press coverage, and social media searches. The **£48,000+ annual value estimate is conservative**. With full access to her newsletter list, Academy numbers, speaking fee structure, and Foundation data, the actual figure is almost certainly higher. The free audit finds the rest.

Next step

Book your free AI audit

This used only public information. Imagine what we could do with full access to your systems. The free audit goes deeper: your newsletter data, your Academy conversion rates, your speaking pipeline, your Foundation donor list. We find every gap and show you exactly what to automate first.

WHEN WE SIT DOWN TOGETHER

£100,000+

estimated value identified per year

The £48,000 figure in this report came from public data alone. When we sit with you properly and map every task, every revenue stream, every audience touchpoint, and every operational bottleneck, the number almost always doubles. Clients who go through a full audit with us typically see £100,000 or more in identifiable value every single year. That is time saved, revenue unlocked, and cost removed. The audit is free. What it reveals is not.
