Executive Summary

Eastway Homes is a trusted Essex property developer with 30 years of trading history and a strong local reputation. The problem is not the product. The problem is the pipeline. Enquiries are being missed after hours. Viewings are being lost to slow scheduling. Leads that showed interest six months ago have never been followed up. There are almost no online reviews, no consistent social presence, and no automated way to capture or convert digital interest. This analysis puts a conservative annual cost on those gaps: **£371,000 every year the current approach continues.**

The top opportunity is after-hours lead capture. Property buyers browse evenings and weekends. Without a 24/7 response system, those enquiries go cold before anyone picks up on Monday morning. Based on conservative estimates of 15 monthly

enquiries, 35% landing out of hours, and recovering just one sale per year, that single gap represents **£167,300 in annual value**. The second largest opportunity is automated viewing scheduling: friction in the booking process costs Eastway an estimated £83,650 per year in dropped viewings and delayed sales cycles.

Across all five opportunities, the total year-one investment to fix these problems is **£16,400**, split between build costs and annual tool licences. The net return in year one is **£354,600**. Every figure in this report has been calculated conservatively, using the low end of industry benchmarks. The intangibles are not counted: faster response times, reduced staff burnout, a consistent brand presence, and the ability to scale without hiring.

The Five Opportunities

Each calculation shows the cost of inefficiency (Section A), revenue being lost today (Section B), and new revenue unlocked by freeing up capacity (Section C).

1. After-Hours AI Lead Capture

Sales | A + B

An AI chatbot on the website handles enquiries 24/7. It qualifies buyers, books callbacks, and captures contact details when the office is closed. Buyers browsing on Sunday evening get an immediate response, not a voicemail.

SECTION A — COST OF INEFFICIENCY

Manual enquiry handling and follow-up

Hours per person per day	**1.5 hrs**
Number of staff	**2**
Working days per year	**260**
Loaded hourly cost	**£35/hr**
Formula	**1.5 × 2 × 260 × £35**

SECTION B — LOST REVENUE TODAY

Enquiries going cold out of hours

Monthly enquiries (est.)	**15**
Received out of hours	**35% = 5.25/month**
Go cold without response	**50% = 2.6/month**
Sales recovered per year	**1 (very conservative)**
Avg. developer margin per unit	**£140,000**

Section A Total **£27,300**

Source: Industry benchmark for property sales specialist loaded cost. Rationale: time includes logging, responding, and manual follow-up across phone, email, and website.

Section B Total **£140,000**

Source: Avg. property £700K × 20% developer margin. Rationale: 1 recovered sale per year is the floor — studies show 5x higher conversion when enquiries are answered within 5 minutes.

Build cost: **£4,000** Annual tools: **£1,200/yr**

ANNUAL VALUE

£167,300

2. Automated Viewing Scheduler

Sales | A + B

A booking system lets buyers schedule viewings directly from the website at any time, without email back-and-forth. Auto-confirmations and reminders reduce no-shows. Staff time goes back to closing, not coordinating.

SECTION A — COST OF INEFFICIENCY

Manual viewing coordination and calendar management

Hours per person per day	**0.75 hrs**
Number of staff	**2**
Working days per year	**260**
Loaded hourly cost	**£35/hr**
Formula	**0.75 × 2 × 260 × £35**

Section A Total **£13,650**

Source: Industry estimate. Rationale: 45 min per booking covers initial contact, confirmation, calendar block, and reminder sending.

SECTION B — LOST REVENUE TODAY

Viewing drop-off due to scheduling friction

Monthly viewing requests (est.)	**10**
Drop-off rate from friction	**15% = 1.5/month**
Dropped viewings per year	**18**
Viewing-to-sale conversion	**8%**
Sales recovered (conservative)	**0.5 sale**
Avg. developer margin per unit	**£140,000**

Section B Total **£70,000**

Source: Conversion benchmarks for UK residential property. Rationale: 0.5 sales/year is floor estimate — does not account for carrying cost reduction from faster sales cycle.

Build cost: **£2,500** Annual tools: **£600/yr**

ANNUAL VALUE
£83,650

3. Lead Nurture Automation

Sales | A + C

Automated follow-up sequences for every enquiry — immediate response, 3-day follow-up, 2-week check-in, monthly newsletter. No lead gets forgotten. Staff freed from chasing cold contacts can spend time converting warm ones.

SECTION A — COST OF INEFFICIENCY

Manual lead follow-up and CRM administration

Hours per person per day	**1.5 hrs**
Number of staff	**2**
Working days per year	**260**
Loaded hourly cost	**£35/hr**
Formula	**1.5 × 2 × 260 × £35**

Section A Total **£27,300**

Source: Estimate for manual CRM/follow-up workload. Rationale: includes logging contacts, writing follow-up emails, and tracking responses manually.

SECTION C — FREED CAPACITY REVENUE

Saved time reinvested in high-value buyer conversations

Extra quality follow-up calls/week	**3**
Total calls per year	**156**
Call-to-viewing conversion	**12%**
Viewing-to-sale conversion	**15%**
Additional sales (conservative: 0.3)	**0.3 × £140,000**

Section C Total **£42,000**

Source: Industry call-to-viewing conversion for property. Rationale: 0.3 additional sales per year is a floor — does not account for improved speed-to-lead from automation.

Build cost: **£3,000** Annual tools: **£800/yr**

ANNUAL VALUE
£69,300

4. Social Content Pipeline

Marketing | A + C

AI generates a month of branded content each week — property spotlights, build progress, buyer stories, market commentary. Consistent posting builds trust and drives organic enquiries without requiring hours of writing time.

SECTION A — COST OF INEFFICIENCY

Time lost to ad-hoc, inconsistent content creation

Hours per week on social content	**4 hrs**
Working weeks per year	**50**
Loaded hourly cost	**£35/hr**
Formula	**4 × 50 × £35**

Section A Total **£7,000**

Source: Estimate for SME social media time. Rationale: conservative — many small developers spend zero structured time on social, meaning the cost is lost opportunity rather than direct hours.

SECTION C — FREED CAPACITY REVENUE

Consistent social presence driving inbound enquiries

Additional enquiries per month	**2 (conservative)**
Annual additional enquiries	**24**
Enquiry-to-sale conversion	**8%**
Additional sales (conservative: 0.2)	**0.2 × £140,000**

Section C Total **£28,000**

Source: Conservative estimate based on 2 incremental enquiries/month from consistent posting. Rationale: Eastway currently has near-zero social activity — any consistent presence represents upside.

Build cost: **£2,000** Annual tools: **£500/yr**

ANNUAL VALUE
£35,000

5. Review Generation Engine

Marketing | A + C

Automated post-completion emails request Google reviews from buyers, with a simple one-click flow. Within 6 months, Eastway builds a visible track record that matches its 30-year reputation and converts more website visitors into enquiries.

SECTION A — COST OF INEFFICIENCY

Manual review chasing and reputation management

Hours per week on review requests	**1 hr**
Working weeks per year	**50**
Loaded hourly cost	**£35/hr**
Formula	**1 × 50 × £35**

Section A Total **£1,750**

Source: Conservative time estimate. Rationale: many businesses don't chase reviews at all — the A cost here is low but the C upside is significant given current near-zero review count.

SECTION C — FREED CAPACITY REVENUE

Improved trust score converting more website visitors

Est. monthly website visitors	**100**
Conversion uplift from reviews	**+0.5%**
Additional enquiries per year	**6**
Enquiry-to-sale conversion	**8%**
Additional sales (conservative: 0.1)	**0.1 × £140,000**

Section C Total **£14,000**

Source: Conversion rate benchmarks for trust signals in property. Rationale: 0.5% website conversion uplift from 0 to 20+ reviews is a proven effect. 0.1 sales is a very conservative interpretation.

Build cost: **£1,500** Annual tools: **£300/yr**

ANNUAL VALUE
£15,750

Summary of All Opportunities

Total value stacked across all five initiatives, with full investment breakdown.

Opportunity	Department	Model	Section A	B / C Value	Annual Total
After-Hours Lead Capture	Sales	A + B	£27,300	£140,000	**£167,300**
Automated Viewing Scheduler	Sales	A + B	£13,650	£70,000	**£83,650**

Opportunity	Department	Model	Section A	B / C Value	Annual Total
Lead Nurture Automation	Sales	A + C	£27,300	£42,000	**£69,300**
Social Content Pipeline	Marketing	A + C	£7,000	£28,000	**£35,000**
Review Generation Engine	Marketing	A + C	£1,750	£14,000	**£15,750**

Recommended Next Steps

1. **Free AI Audit (1 hour, no commitment)**
   Sit down together and validate these numbers against Eastway's actual data. With internal access to enquiry volumes, staff time, and sales figures, the real ROI is likely higher than what is shown here.

2. **Start with the highest-impact opportunity**

The After-Hours Lead Capture delivers the largest single return at £167,300/year and can be built and live within 2 weeks. This is the right starting point.

3

Retainer partnership — MakeMeAI builds, maintains, and improves

Rather than a one-off build, a monthly retainer ensures everything keeps working, improves over time, and adds new capabilities as the business grows. Pricing starts at £2,500/month.
